FROM: Bradley B. Brooks

SUBJECT: BARCLAY

DATE: November 27, 1989

I am pleased to report the unanimous, favorable vote of the International Standards Organization meeting in Cuba this past Thursday for four new Draft International Standards, one of which was new Testing Method B providing for a new cigarette testing methodology.

As you will recall, this development follows a number of successive favorable votes within CORESTA over the past few months in Interlaken, Switzerland, Cesme, Turkey and in Rome, Italy.

The four Draft International Standards will now be published, which is expected to take place in the first quarter of 1990, following which there will be a mail vote for formal adoption of the International Standards.
